OBJECTIVE

B.Tech Computer Science (AI & ML) student with hands-on experience in cloud computing, AWS, Docker, CI/CD, Python, SQL, and machine learning. Experienced in deploying and containerizing applications using AWS EC2, S3, Amazon ECR, Docker, and GitHub Actions. Seeking fresher/internship opportunities in Cloud Engineering, DevOps, Software Development, or AI/ML where I can contribute to building scalable and reliable applications..

WORK EXPERIENCE

Technical Trainee – Cloud Computing

Jun 2026 – Aug 2026

Ziion Technology, Mohali, India

- Gained hands-on experience with AWS cloud services, application deployment, and cloud infrastructure.
- Worked with AWS EC2, S3, Amazon ECR, Docker, and GitHub Actions to deploy and manage applications.
- Containerized applications using Docker and configured deployment workflows using GitHub Actions CI/CD.
- Assisted in configuring AWS resources and implementing automated application deployment workflows.

Technical Trainee – Machine Learning

Jun 2025 – Aug 2025

Ziion Technology, Mohali, India

- Assisted in preprocessing and analyzing datasets of 10,000+ records for ML model training.
- Contributed to model development and evaluation improving performance metrics.
- Collaborated with a team of 4 members on real-world machine learning projects.

EDUCATION

B.Tech CSE (AI & ML)

2023 – 2027

DAV Institute of Engineering & Technology, Jalandhar

CGPA:8.53

Senior Secondary (CBSE)

2022 - 2023

Jawahar Navodaya Vidyalaya

88%

Matriculation (CBSE)

2020 - 2021

Jawahar Navodaya Vidyalaya

92%

SKILLS

Cloud & DevOps: AWS (EC2, S3, ECR), Docker, GitHub Actions, CI/CD, Git, GitHub

Networking: TCP/IP, IP Addressing, DNS, DHCP, HTTP/HTTPS, Subnetting

Programming & Web: Python, C, C++, Java, HTML, CSS, Flask

Database: MySQL, SQL

Tools: Power BI, Visual Studio Code

AI & ML: Machine Learning, Deep Learning, Computer Vision, Neural Networks

Soft Skills: Communication, Teamwork, Leadership, Problem-Solving

PROJECTS

- **Cloud Native Brain Tumor Detection System:** Developed an ML-based MRI classification application using OpenCV and Scikit-learn. Built the application using Flask and containerized it with Docker. Deployed the application on AWS EC2, using Amazon ECR for container management and GitHub Actions for CI/CD automation.
- **Automated Portfolio Deployment using AWS S3, CloudFront & GitHub Actions:** Developed and deployed a cloud-native portfolio website on AWS S3 with CloudFront and automated CI/CD using GitHub Actions.
- **OCR Text Detection System:** Built OCR system achieving 85% text extraction accuracy using OpenCV and PyTesseract.
- **AI Self Learning Chatbot:** Created chatbot using TF-IDF with dynamic learning and API fallback.
